| <input type="checkbox"/> | Annual maintenance assistance | <input type="checkbox"/> | Planting assistance |
| <input type="checkbox"/> | Other: _____ | | |

Site Preparation

Please describe in detail the following (attach additional sheets if necessary): (1) are invasive species present on the site? If so, which species(s) and how will they be removed/treated prior to the planting?

(2) Does extensive dead/dangerous/dying tree removal, bank stabilization or other major preparation need completed prior to planting? If so, what is the timeline/funding for this work to take place? (3) Are there any other site preparation steps that need taken prior to planting on concerns to address regarding utilities, etc.? _____

Maintenance Procedures

Please describe post-planting maintenance activities and responsible parties (attach additional sheets if necessary), including: (1) seasonal mowing/spraying, (2) annual inspections, (3) invasive species removal, (4) watering (if applicable), (5) tube/fencing inspection and removal, and any other procedures related to ensuring a successful tree planting.

Mapping

Applications must include a shapefile OR an aerial image indicating the planting extent of the proposed project (attached as an additional sheet or file accompanying this application form).

2. *The WAY: Watershed Forestry Program Application*

Planting Plan

Applications must include a basic planting plan (attached as an additional sheet/file accompanying this application form). At a minimum, planting plans should detail which tree/shrub species are proposed for planting, the quantity of each species, and the proposed density and distribution per acre. **Final planting plans must be approved by WAY before planting.**

Application Submission

Please send this **completed project application, a shapefile OR an aerial image** indicating the planting extent of the proposed project, **and planting plan** to **Watershed Alliance of York**.

After *The WAY: Watershed Forestry Program Application* has been received, WAY will conduct a review of the application, schedule and conduct a site visit, and determine eligibility for planting.
